EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's representative, Leonard Mitchard on November 29, 2006.

The application has been amended as follows:

In the specification, the heading "Brief Description of the Drawings" has been inserted at page 9, between lines 14 and 15.

In the claims: in claim 48, line 3, the number, one (1) has been inserted before the period.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the closest prior art of record, i.e., references listed on PTO-892 and PTO-1449 forms, teach the production of acetic acid by carbonylation of methanol or a derivative thereof, with carbon monoxide, in the presence of an iridium catalyst, ruthenium promoter, methyl iodide co-catalyst, methyl acetate, and water. The closest prior art, however, fails to teach or fairly suggest recycling a liquid fraction from the flash separation stage to the carbonylation reaction zone, wherein the concentration of carbon monoxide in the low-pressure off-gas is maintained according to the formula recited in the independent

claim. There is no teaching or suggestion in the prior art to maintain the carbon monoxide concentration according to the formula recited, and in relation to the concentration of ruthenium in the liquid reaction composition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
